

## USING MORPHO SNOWSHOES

1. Untighten **ankle strap** (by loosening completely the **notch strap** from the **buckle** of the strap) as well as the **toe strap** so as to insert your boots and to adjust the **heel thrust** of **articulated binding** plate to your boot size. See Fig.3

2. Place the toe of your boot against the front part of the articulated binding plate, inside the toe strap, making sure the webbing of the strap is above your boot.

3. Adjust the heel thrust to the proper size of your boot using the Morpholock system. See Fig.2:

3a-raise the **size adjust lever** with the help of **logo rubber tab puller** and move the **heel thrust** on the binding to the proper size of your boot: the heel of your boot must touch the back of the heel thrust for **perfect maintaining of the boot while snowshoeing**

3b-when size is correctly adjusted release the rubber tab: the heel thrust is then locked in the binding slots thanks to the teeth of the size adjust lever.

4. Your boot is then well adjusted lengthwise: start **tightening the toe strap firmly** by pulling the printed webbing after insertion in the two holes quick buckle. Due to the flexible material of the binding front lateral parts your boot perfectly fits the binding.

5. Insert the loosened notch strap (step1) inside the ratchet buckle of the ankle strap around your boot then **tighten micrometrically the ankle strap** by moving back and forth the lever of ratchet buckle **until you feel firmly tightened**.

6. **Snowshoeing: articulated binding plate is free** from snowshoe base when going flat, traverse, uphill or downhill.

7. **After use, untighten ankle strap** first: push on the **release lever** of the ratchet buckle and pull out the ankle strap from the notch strap while keeping pressure on the **buckle push release lever**. Then untighten the toe strap: pull up the end of the quick buckle and loosen the webbing. See fig 3. Remove your boot.

8. **ALWAYS rinse** snowshoes with water and brush to remove mud and debris after every use.

## MORPHOLOCK®

## USER TIPS AND TECHNIQUES

.MORPHO® snowshoes don't have a right or left snowshoe. MORPHO recommends to wear the snowshoes so that the ankle ratchet buckle and toe strap buckles are on the outside of the foot so as to tighten ankle and toe straps in the easiest way.

.Kneeling on one knee and wearing the other foot snowshoe is the best position to be when putting on the snowshoes. This gives you the best grip and leverage for inserting and tightening the straps.

.Ankle and toe straps must be firmly tightened around your boot

.**Do not snowshoe on rock or concrete**, this causes excess wear: take off snowshoes until you are back on snow.

## CHARACTERISTICS

- . Ratchet buckle snowboard type **ankle strap** with **one** 22.5cm curved notch strap, micrometric adjustment, **WITHOUT** pad: excellent comfort
- .Stainless steel 2mm thick front knives
- .TRIMMY© patented snow Trimaran shape  
3D MORPHOLOGIC, Hull shape tip
- .Contact surface: 2 x 945cm<sup>2</sup>, Weight per pair: **1.65Kgs**
- .Length: 56cm, max. Width: 20.4cm, Tip height: 9.4cms
- .Trim angle: 20°

### GENERAL:

- .Material: polypropylene copolymere base, Polyamid 66 rigid articulated binding, polyacetal quick lock buckle type toe strap, 6 metallic spikes perfect grip
- .Base structure with “X” vertical stripes providing best grip uphill, downhill and in traverse.
- . Accepts all types of boots from 19 to 35cms, (graduation on the binding),
- . Very easy boot size adjust Morpholock system.
- . Guaranteed **2 years** down to -38°C, shock resistant.
